The park is a unique spot which offers several diverse natural features with high aesthetic value. Mainly, the site is a thick limestone forest fronting a coral coastline with turquoise sea water. The landscape portion of the park, with an area of 57 hectares, is home to endangered species of wildlife such as the “Tarsier” (*Tarsius syrichta*) and the “Flying Lemur” (*Cynocephalus volans*). Its seascape portion, with an area of 1,264 hectares, is noted to be feeding and nesting sites of the endangered marine turtle.

**Notable Features of the Park**

- A gigantic centennial tree. The park is totally covered by the canopy of trees.
- The turquoise sea water viewed from a shaded area of the park.
- Caves are also features one could visit and explore at the park.

**Location:**

Tubigan, Initao, Misamis Oriental

**Accessibility:**

The park, which is midway between two major cities in northern Mindanao (Cagayan de Oro City & Iligan City) could be accessed from both ends through bus rides. The national hi-way which connects these cities directly cuts across the protected area. It takes about 45 minutes to get to the park from either way.

**ECOTOURISM**

The park is frequently visited by excursionists as well as foreign and local tourists. Some roadsters also take a sojourn at the park.

**Viewing deck**

**Tree-shaded pathway**

**Picnic/dining area**
