Mt. Malindang Natural Park

Malindang mountain range covers an area of 53,262 hectares. It occupies about 41% of the province of Misamis Occidental. It is a rich habitat sheltering diverse flora and fauna which include species endemic only to the site. It is also home to the endangered Philippine Eagle (Pithecophaga jefferyi).

The thick canopy of the forest provides a perfect home for the endangered Philippine Eagle. Mt. Malindang is a significant watershed sustaining life within and around Misamis Occidental and its neighboring areas.

Spectacular Features

These valleys display the steep terrain of Mt. Malindang. The range is recognized nationally as one of the best mountaineering spots in the country.

Location:
Misamis Occidental

Accessibility:
The shortest route to the site from Manila is via Dipolog City which is facilitated by air travel. From Dipolog, buses are available for Oroquieta City where the Park Superintendent's Office is located.

The Subanen highlanders. Subanens are the indigenous people of Mt. Malindang.

Sunset at Don Victoriano. Don Vic is the only municipality of Misamis Occidental situated in the heart of Mt. Malindang.

Pidaaan is a unique waterfall. Its waters ooze out of a cliff wall instead of dropping off from an elevated mountain stream.

The ice-cold waters of Lake Duminagat. This is the most popular spot in the range.
